INSTALLATION PROCEDURE FOR WALL MOUNTING FAN

1. Secure the wall base unit onto the wall. (at least 2.3 meter from the ground floor)
2. Hold the rear guard on the motor, and fasten by the set screw.
Fit the blade onto the shaft, and secure by the screw. Then, fix the rear fan guard.

The screw(M6) should be placed in this position

OPERATION INSTRUCTIONS

1. Voltage varies between countries. The local power supply must be compatible with the technical data shown on the motor data label before the fan is connected to the power source.
2. The plug must be inserted to an earthed socket, which complies with the Safety Regulation of the local authority.
3. For safety purpose, the wall fan is to be installed so that the blades are more than 2.3 metres above the floor.
4. For smooth oscillation of fans, a slack of 0.4m should be left when securing power cord from motor to stand tube or wall tube.(note tag on power cord).
5. For safety purpose, the recommended maximum height for the Pedestal unit is 1.25 meters. (Care must be taken during adjusting the height of the standing fan).
 - > Grip the rubber handle at the top of the inner tube
 - > Using the allen key provided unfasten the screws and adjust the fan to the desirable height.
 - > Tighten the screw and put the allen key back in its pocket at the rubber handle.
6. The fan is fitted with a 3-speed, on & off rotary switch to adjust air velocity (1-low, 2-medium, 3-high and stop/off fan operation).
7. Always turn off the power at the power point and remove plug when maintenance or cleaning is carried out. Failing to do so may cause electric shock or injury as the fan may activate suddenly.
8. When cleaning is carried out
 - > Turn off the power at the power point and remove the plug.
 - > Remove the front guard
 - > Remove the blade from the motor by loosening the blade fixing screw.
 - > Remove the rear guard.
 - > Remove dirt with a cloth moistened with lukewarm water or a household neutral detergent and wipe dry after cleaning.
 - > When re-assembling, use the reverse order of disassembling.Ensure impeller blade is secure and tight on motor shaft.
9. For the best performance and safety, the fan must not be used when:
 - a. Temperature is lower than -15⁰C or higher than +40⁰C.
 - b. Humidity (at 25⁰C) is exceeding 90%.
 - c. In a corrosive environment, such as factory producing corrosive chemical.
10. Never try to disassemble, service or modify the fan.This may cause fire, abnormal activation, electric shock or injury. For servicing, contact the store where you purchased the fan.
11. Do not operate the fan without the blade and the guard installed. Doing so may cause injury.
12. Do not damage,forcibly bend, twist,pull or put a heavy object on the supply cord. Doing so may cause electric shock or a short circuit if used whilst damaged. If the supply cord is damaged, it must be replaced with a new cord by the manufacturer ,its service agent or similarly qualified persons in order to avoid a hazard.
13. The fan motor is fitted with a thermal protection device.

If a fault occurs, the fan may start and stop intermittently without warning. This may occur due to irregular power supply or excessively high ambient temperature. However if motor is faulty ,switch off immediately and return fan to the supplier or service agent.
14. This appliance is not intended for use by young children or infirm persons unless they have been adequately supervised by a responsible person to ensure that they can use the appliance safely.
15. Young children should be supervised to ensure that they do not play with the appliance.
